

CHOOSE US FOR...

High Security Data Erasure

We specialise in legislative compliance with data safety at the heart of everything we do. We adopt a no compromise approach, providing data erasure or destruction for all data bearing assets.

Financial Return for your Assets

Through refurbishing and re-marketing your assets we generate industry leading returns through the resale of your data wiped assets. Financial returns can then be used to credit new purchases through Academia.

Detailed Audit Trails

You will receive transfer of ownership documents, data wiping certificates and a full inventory report for all data bearing assets processed through our service.

Configuration, Deployment & Disposal

We provide a single solution for IT refresh projects, covering procurement, configuration, installation and disposal of legacy assets

Reduced Carbon Footprint

Promoting re-use over recycling reduces the lifetime carbon footprint of your assets. You are also reducing the environmental impact associated with manufacturing new equipment.

IT ASSET DISPOSAL SERVICES

When IT assets reach the end of their working life for your organisation, it doesn't have to mean disposal. Our ReviveIT process offers organisations a high security service to data wipe, refurbish and remarket used IT assets, returning residual value to our clients.

WHY US?

Compliance & Data Focused

Total peace of mind that your data is irretrievable using CESG approved software or physical destruction

Trade In

Use the financial return from your legacy assets to reduce your acquisition cost of new technology. Save up to 20% on new Apple Hardware when trading in.

Robust Management Processes

We are accredited to ISO 9001, 14001 and 27001
